The Basics of Open Access
organization and structure

Dominique Chalono
December 2019

Organization

- Shared system of promotion and registration managed by the transversal training courses office (ARD)
- Set-up determined by the trainer : date, length, balance between practice and theory
- Large audience, but mainly targeted at doctoral students
- Evaluation sent to the trainer : anonymous & **mandatory to receive the attendance certificate**

The basics of Open Access

- In combo with the training course on copyright or the training course about the institutional repository (ORBi)
- ~1h
- Small group, often beginners
- No practice but conversational (Q&A)

Structure

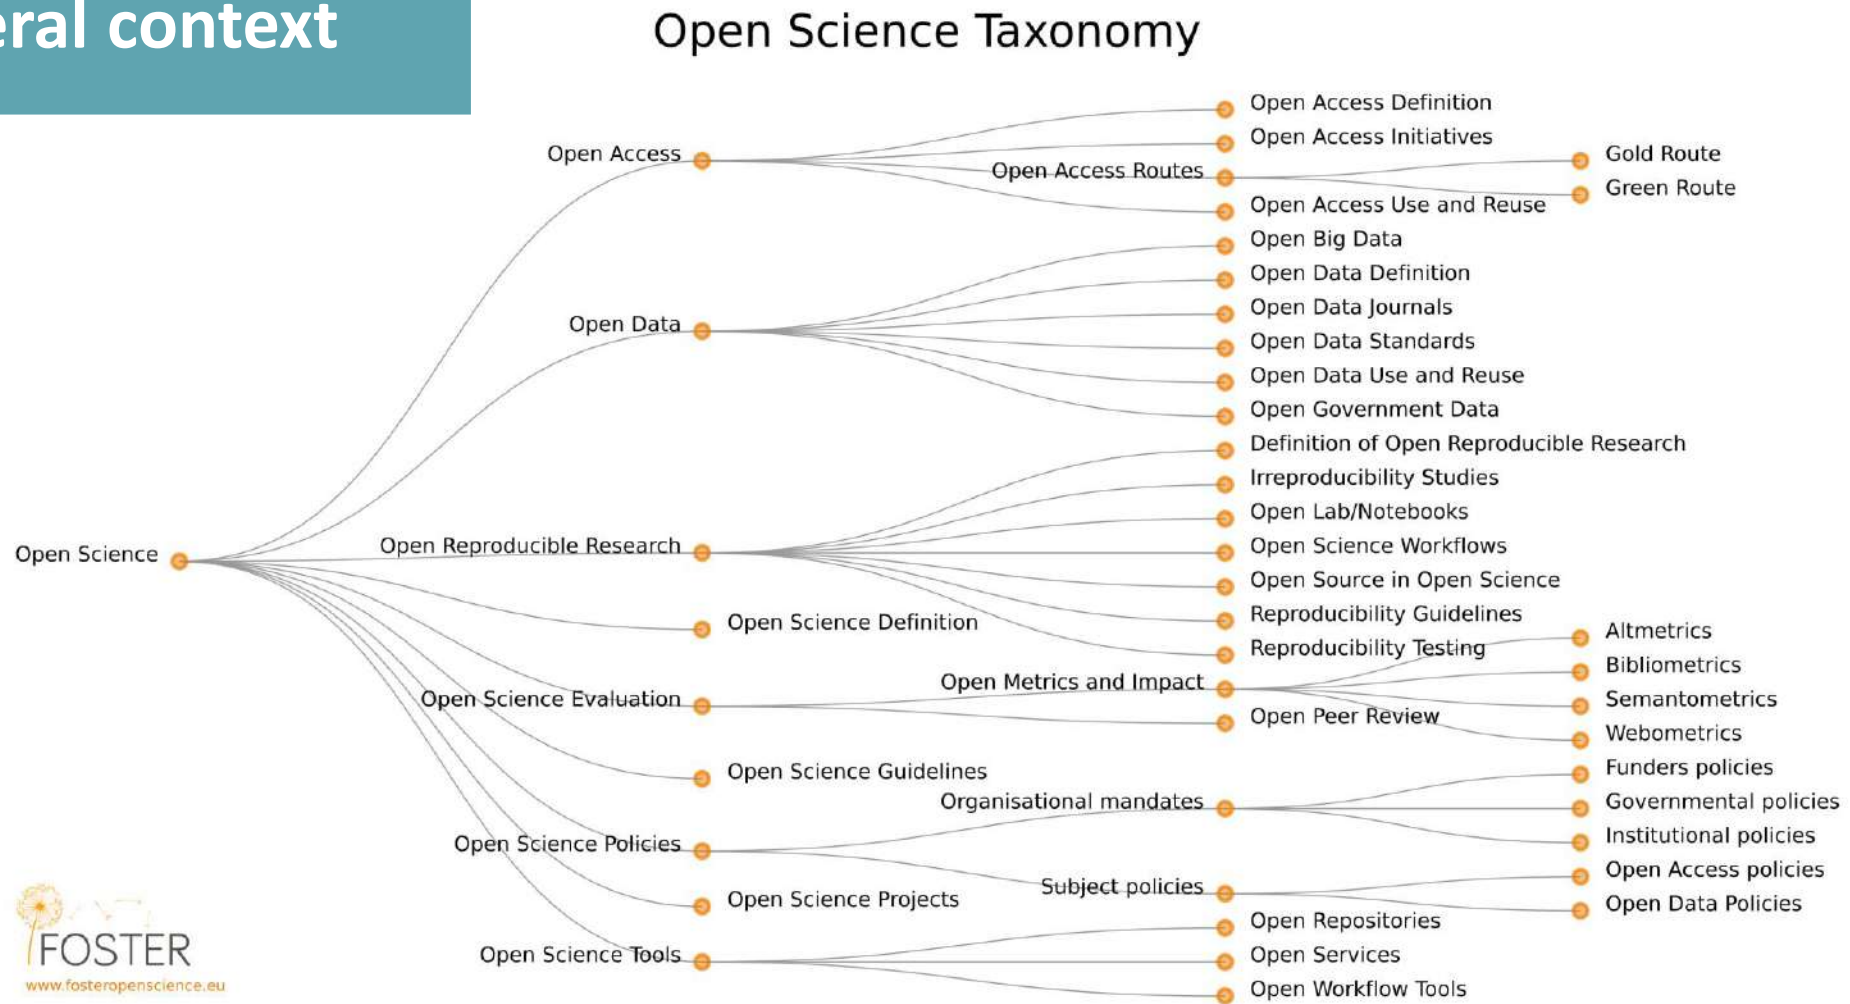

- **General context** : Why are you here, what is the purpose of the formation?
- **Definition** : What are we talking about? Let's clarify the situation.
- **History of the subject** : What do you already know? Here is what we have to add...
- **Benefices** : What are you going to gain from this ?
- **How to** : How to apply this new knowledge, how to use the tools presented?
 - Real examples, exercises, testing, Q&A, demo...
- **Local context & services** : What we do at ULiège – ULiège library
- **Contact** : Love it or hate it, but let us know!
- **Deliverable** : ppt, links, flyers, video...

The basics of Open Access

General context

The FOSTER Open Science taxonomy.

Definition

Definition

« By "open access" to [the scientific] literature, we mean **its free availability on the public internet**, permitting **any users** to read, download, copy, distribute, print, search, or link to the full texts of these articles, crawl them for indexing, pass them as data to software, or use them **for any other lawful purpose, without financial, legal, or technical barriers** other than those inseparable from gaining access to the internet itself. The only constraint on reproduction and distribution, and the only role for copyright in this domain, should be **to give authors control over the integrity of their work and the right to be properly acknowledged and cited.** »

From [Budapest Open Access initiative](#)
(BOAI, 2002)

Definition

Definition

Availability of the scientific literature for everyone, freely, at no cost for the reader and in compliance with the holders of the rights

- **any users** → international access through the web, for everybody (researchers or not)
- **free availability** → no registration, no fees or any barriers
- **without financial, legal, or technical barriers** → readers does not have to pay for accessing and reading the documents
- **for any other lawful purpose**
 - in respect of the publisher's policy and with the author's agreement
 - in respect of the author's right (citation, paternity, integrity)

Why change?

Economic threat

NEED

Philosophy

WILL

Technological possibility

CAPACITY

Benefices

More benefices...

Free access for
all to up-to-date
information &
publications of
Academic quality

How to

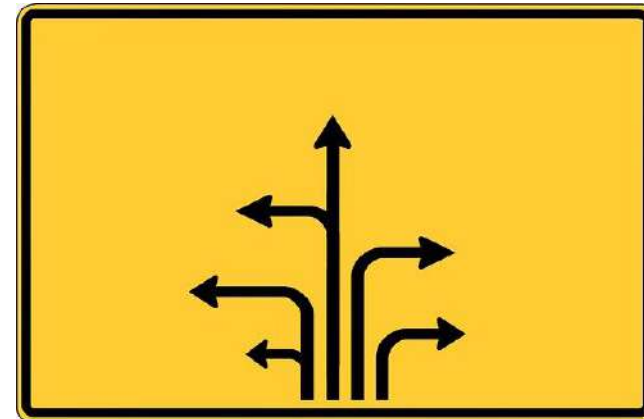

Green Open Access

Deposit in an open archive
before/after publication

How?

Gold Open Access

Publication at no cost
for the reader

&
Hybrid model

How to - the good

Publish where and like you want to!
(OA or not)

Negotiate the publishing contract and keep your author's right

Green first !

Deposit the full text in an open archive
80% of publishers allow it
(with or without conditions)

How to - the bad

ResearchGate, Academia.edu = not OA

Hybrid model

Predatory journals

DANGER
KEEP OFF

ULiège mandate

It is mandatory for every member of the University of Liège to add in ORBi

- Bibliographic references of scientific publications and communications upon acceptance by the publisher
- Full text for each scientific article published since 2002
- Every doctoral thesis must be added to ORBi PRIOR to its defense at ULiège, and accompanied by all or part of the full text, with at least the abstract and the table of contents

The level of access is determined by the authors in respect of the publisher's policy and with the co-authors agreement

Only the publications on ORBi will be considered for evaluations or internal procedures by the ULiège or FRS-FNRS

if it's not on ORBi, it does not exist

3. Articles in peer reviewed academic journals

3.a. With an international target audience

As first or last author

-  Georges, E., Braun, J., & Lemort, V. (2016, August). *A energy generation and storage in residential housing.*

Support

10 ans d'Open Access à l'Université de Liège

<https://www.youtube.com/watch?v=DimDThNcsH4>

- Centralized system & freedom in the format
- Large & mixed audience
- Evaluation form

- Centralized system → Difficult to see what's available, local and regular promotion needed
- Large & mixed audience → Different levels of knowledge/practice
- Evaluation form → Same for everyone, not always appropriate. **Only for those who need attendance certificate**

Catching your audience.

They don't know that they don't know!

Key points

« **Simplicity is the ultimate sophistication** »

Q&A - make it a conversation

Timing

All of this for that? - not too long, not too short

How available is your audience? - student \neq researchers

Keep contact - thank you email, follow up with complementary information

Deliverable - pdf/ppt, complementary video/documents, etc.

Stay up to date

Adaptability for multi use(r)s

Promotion, promotion, promotion...

Thank you!
