**PATTERNLAND.
THE INEQUALITY IN ART**

Dr. Pier Francesco Sciuto

Emilia Romagna Region Geological Service

Introduce Prof. **Marco Lazzarato**

Academy of Fine Arts of Bologna

From the Greek and Roman worlds to our Middle Ages and the splendid Islamic tessellations, Sciuto's formulas (which use only the mathematical and trigonometric knowledges of the time, unchanged since the 2nd century B.C. for more than 1,600 years) go further, touching on art and artists of the early 20th century, with geometric effects sometimes rigorous sometimes psychedelic, but always surprising. Are you ready for an immersive journey into the tessellated world of patterns?

From 6:30 to 8 p.m. in the Cloister Room
of the Faculty of Civil and Industrial Engineering -
Sapienza University of Rome

Biblioteca Dario Nobili
Consiglio Nazionale delle Ricerche
Area Territoriale di Ricerca di Bologna

PIER FRANCESCO SCIUTO

PATTERNLAND

■ $\sin(r \sin rx \cdot \sin ry) > 0$

■ $\sin(r \sin rx \cdot \sin ry) < 0$
