

## A NEW WINDOW ON IAQ IN SCHOOLS: the potential of indoor air quality learning pathway on the employability of VET students

**CHANGE - Co2 monitoring in schools for digital and Green competences** aims at developing a **STEM pathway** centered on Indoor Air Quality (IAQ) in schools of Bulgaria, Italy, Romania and Spain. The didactic material consists of a theoretical section on **IAQ and climate changes**, a practical section on the **assembly of open-source CO2 monitoring stations** and their usage for **experiments** and **continuous monitoring**.

[co2lab.it/change-erasmus/](https://co2lab.it/change-erasmus/)

The seminar organized by PROAMBIENTE and Institute CNR-IMM of Bologna will offer a glance on the novel development of the indoor air quality sector, with special focus on **good practices and guidelines** to maintain health and wellbeing in classrooms. The CHANGE project will be presented as well as experiences of the students involved perspectives on career prospects.

### 11.00 | INTRODUCTION OF EVENT AND CHANGE PROJECT

*Stefano Zampolli, National Research Council of Italy*

### 11.05 | INDOOR AIR QUALITY: THE CURRENT STATE

*Gaetano Settimo, Istituto Superiore di Sanità and Società Italiana Indoor Air Quality*

### 11.20 | INTEGRATED APPROACH TOWARDS INDOOR WELL-BEING IN SCHOOLS

*Katia Ferrari, Clust-ER Greentech*

### 11.35 | CHANGE LEARNING PATHWAY

*PROAMBIENTE and CHANGE partner schools*
